

Combination AC and Auto/Air Notebook Power Adapter

The only all-in-one mobile adapter connecting notebooks plus a mobile phone or handheld simultaneously to any power source. Peripheral

Powering System accessory required for mobile phones and handhelds.

Power Up

Compatible with all major notebook brands.

Comprehensive capacity and compact profile unite as a truly innovative mobile solution.

Slim Down

All-in-one power never looked so good.

With **Juice**, one adapter can take care of a notebook, mobile phone and a handheld.

Recharge Anywhere

Recharge your mobile gear on the road, in the air or behind a desk. If you've got a power source, then you've got the **Juice** to keep running:

AUTO—plugs into standard auto lighter sockets

AIR—designed for aircraft in-flight outlets

AC—fits standard outlets

Energize Anytime

Plugs in to any standard wall outlet, auto outlet or air outlet for long-lasting performance.

Now there's **one adapter** that does the job of three.

Q&A

Q. I'm on the road a lot. How do I "juice up" my notebook in my SUV as I'm heading down the highway?

A.  It's a good thing auto makers still make cigarette lighters and ashtrays—the **Juice** adapter fits right into the lighter socket, giving you all the power you need to keep your notebook up and running. And with its optional PPS accessory, you can do the same for your mobile phone or handheld—with the same adapter. *(By the way, the ashtray's also handy for storing change for tolls.)*

Q. How do I know if **Juice can charge my notebook? Aren't they all configured differently?**

A. You're right—notebooks are all configured differently. But the thing about **Juice** is that it was designed with all that diversity in mind. So check out our compatibility chart on our website and see if your notebook is listed. Chances are, it is. And in that case, **Juice** will deliver the incredibly convenient power of a single, all-in-one power adapter along with tips that fit your equipment. *We've really thought this through!*

Q. I use my notebook all the time, but I don't travel that much. Isn't **Juice pretty much just for the people who do?**

A. The beauty of **Juice** is that it's so flexible and—*pardon the pun*—adapts to virtually any situation! In other words, it doesn't make any difference: whether you're at your desk or in a car,  **Juice** keeps the power on without a lot of fuss and bulky equipment.

Q. What about on a plane? Don't I need another adapter for that?

A. When we say **Juice** has the "Power of One," we really mean it. **Juice** is the only adapter you need, no matter  where you are or what you're plugging into.

Q. **Juice sounds like a cool product, but with all the other gear how do I make room for it in my bag?**

A. If you're already carrying a notebook power adapter in your bag, you've got the room for **Juice**. **Juice** *lightens* your load by eliminating the need to carry a separate notebook AC (wall) adapter, auto/air adapter, mobile phone adapter and handheld adapters.

Juice: What You See is What You Get

The clear advantage of **Juice** is that you really get it all—in one compact package:

Pack it up...

Slim and sensibly designed, **Juice**'s case is an efficient solution that eliminates cable tangles, especially when you're powering more than one piece of gear.

Fly far away...

and plug this into your armrest.

Go for a drive...

while supplying power to your notebook and phone (see optional accessory below).

Use your outlets...

to plug in at home, office or in the hotel.

A tip for you...

Not every notebook is created equal. With that in mind, **Juice** supports most major notebook brands with tips that fit individual models.

Specifications

AC Input: 100-240 V ~ 2A 50/60 Hz

DC Input: 11.75-16 VDC ~ 8A Max.

Continuous power output: up to 70 watts

Safety features: over voltage protection, current limit, over temperature protection, short circuit protection

Unit dimensions: 5.4"L x 2.2"W x 1.0"H

Unit weight: 7.5 oz.

Cord lengths: AC Input-3.0'

DC Input-3.0'

DC Output-6.0'

Peripheral Powering System power output: 7.5 watts DC maximum

Peripheral Powering System cord length: 3.0'

2 year limited warranty
